

Want to be a part of the exciting world of Film Production?

Louisiana Technical College - Mansfield Campus is sponsoring a Grip and Electric training course June 9 to July 3, 2008.

In 4 weeks you can learn the basics of how to work in the grip or electric department on any film and television projects. Additionally the skills learned can be applied to construction, safety, electrical equipment, and other industries.

The course is a 4 week program, with cross training in both grip and electric. The design of the program will consist of classroom sessions and practical sessions that will mirror the actual workings of a film set. Each student will be trained in both crafts and safety.

Students should be physically capable of handling the equipment used on set and have the stamina to work long hours in any weather. A fundamental knowledge of electricity and its basic concepts is a plus. Basic reading and math skills are required of all students.

Want to be a part this growing industry? Call 318-682-5680 to register. Course schedule is Monday through Friday, June 9 to July 3, 2008. Class size is limited and applicants will be considered in the order in which they are received.

* In Association with Louisiana Production Consultants

** Louisiana Technical College - Mansfield Campus will offer course credit for this program if requested

*** LTC - Mansfield is an EEO institution

**** Funding provided through LCTCS - Pathways to Construction
